**Need to sell your home, but not sure if it's in saleable condition?**

**Unsure of what work needs to be done prior to putting it on the market?**

Jon Teppo, of TNT Realty Group, has over 20 years experience in construction, property management, general contracting, and real estate. Let him put his expertise to work for you. As a contractor and owner & operator of several rental properties, both commercial and residential, he has learned how to deal with and overcome issues such as wet basements, roof problems, winterizing, and ventilation. His scope of work includes everything from tree trimming/landscaping to complete remodels. He has also had to learn how to take care of these issues economically and in a way that offers a long-term solution to the problem. *Now he would like to take care of these needs for you!*

After doing an inspection on your home Jon will provide you with a list of items that need to be addressed. He guarantees that all work will be personally overseen and/or done himself. His team is honest, hard working, reasonable, and enjoys the challenge of beating timelines. In addition to this service, as a licensed Real Estate Broker Jon can also list the home for you at a discounted rate.
